Standard 12v Bulbs

The Lucas Standard 12 volt bulb range covers every light bulb in almost any car including dip beam, main beam, indicators, repeaters, tail lights, brake lights, reverse lights, front and rear fog, side lamps and number plate bulbs.

As one of the UK's leading aftermarket bulb distributors, Lucas stocks in excess of 3.5 million bulbs with over 99% vehicle parc coverage and an unrivalled, reputation for quality and value.

Lucas bulbs are instantly recognisable as one of the automotive industry's most trust brands. With a heritage dating back to the earliest vehicles on UK roads and a commitment to continual range development, Lucas remains at the forefront of the automotive aftermarket.

High Intensity Discharge Lamps

HID systems provide 200% more light on the road than a standard Halogen bulb, unlike a standard bulb a HID system requires an electronic ballast to ignite the bulb creating a spark between two points.

HID headlamp burners produce between 2,800 and 3,500 lumens (the measure of light output), from between 35 and 85 watts at 12.8 volts compared to between 700 and 2,100 lumens using 40 to 72 watts on a standard halogen.

HID bulbs also have a average life of 2000 hours compared to the standard bulb which is between 450 and 1000 hours.

HID bulbs are designated a "S" burner or "R" burner, a "S" burner has a plain glass shield and are used in projector type optics where as "R" burners are designed for reflective type optics and have an opaque mask on certain parts of the shield to create the cut off boundary near the top of the low beam.

Lucas

24/7 Long Life Bulbs

A range of bulbs suitable for situations that require lighting to be on at all times

Longer lasting bulbs for replacement of Daylight Running Bulbs

Lucas Performance Upgrade Bulbs

The Lucas range of performance upgrades will give your customer a wide range of versatile bulbs to improve vision, to change the look of their car or to stand out from the crowd.

Lucas performance upgrades are directly interchangeable with no wiring alterations required. All upgrade bulbs are 'E' approved, except for the off road Rally upgrades.

Always replace bulbs in pairs to ensure optimum performance.
